

First

You could simply start by going to

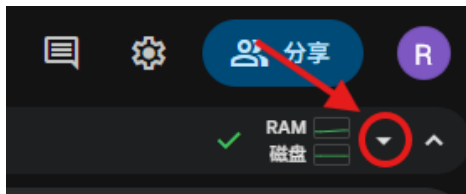

<https://colab.research.google.com/drive/1d42ZAQiUfc7vy5VVpHhHR4vA4ewWFPeS>

Or manually, upload the FM_Tutorial.ipynb to Google Colab:

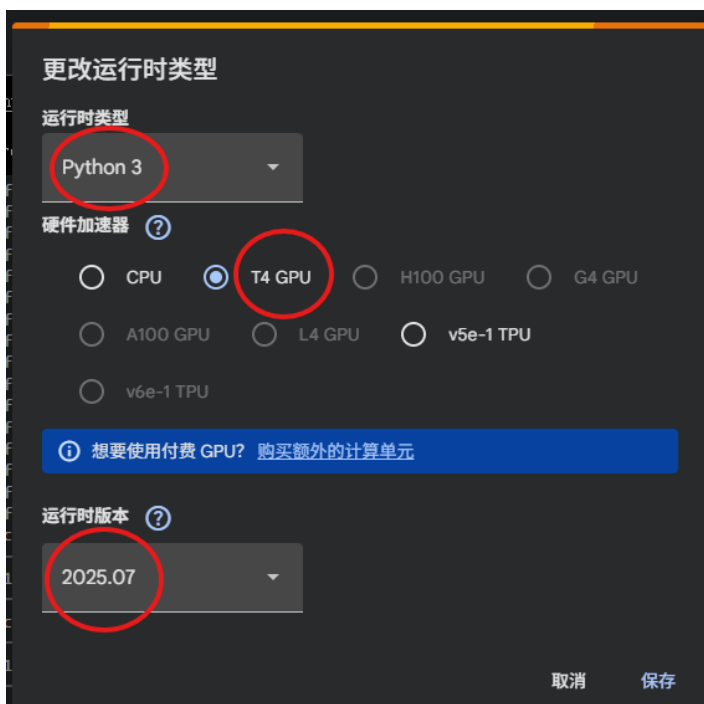

<https://colab.research.google.com/>

Second

On the top right corner, click “change run time”

Use whatever GPU you like; version choose the earliest e.g. 2025.07

Finally

Run the first cell to install packages.

After installation (~1-2 minutes), then run the rest cells.
